**Micro-Coax Appoints ATM As Representative in New England**

**Pottstown, PA - March 5, 2008:** Micro-Coax is pleased to announce the appointment of Advanced Technology Marketing, Inc. (ATM) as their representative in the New England region. ATM provides professional, high quality representation services to select principals who are dedicated to continuous improvement and ultimately customer satisfaction.

Micro-Coax is thrilled to have ATM join the organization because of their dedication to customer service and their belief that the key to success is communication. With those beliefs, ATM strives to become the most recognized IF, RF, Microwave and Power Manufacturer's Representation firm in the Northeast.

**About Micro-Coax:**

Micro-Coax is a leading provider of transmission line solutions for radio frequency (RF) and microwave applications. Serving the defense, satellite, telecommunications, test and measurement markets for more than forty years, Micro-Coax has earned a reputation for mission performance and excellent customer service. A broad technology base allows Micro-Coax to quickly respond to customer needs with optimized solutions of coaxial cables, connectors, harness assemblies and conductive fibers.
