

**PRESS RELEASE**  
FOR IMMEDIATE RELEASE

**Half-Day Fridays for Micro-Coax Employees**

**Pottstown, PA - October 19, 2007:** Micro-Coax employees have elected to operate on a compressed weekly work schedule. Continuing into the Fall, employees at Micro-Coax will work nine hour days from Monday-Thursday, and enjoy a half-day on Friday.

Compressed scheduling is beneficial to our employees because it promotes a healthy balance between work and life. With more flexibility in planning personal appointments, our workforce is less prone to absenteeism and work-related stress.

In addition, Micro-Coax offers employees profit sharing, 401k, paid vacation and holidays. With a growing business, we are continuously seeking new engineers and other positions.

By increasing job satisfaction and morale amongst our employees, we can offer optimum productivity and improved quality for our customers.

**About Micro-Coax:**

Micro-Coax is a leading provider of transmission line solutions for radio frequency (RF) and microwave applications. Serving the defense, satellite, telecommunications, test and measurement markets for more than forty years, Micro-Coax has earned a reputation for mission performance and excellent customer service. A broad technology base allows Micro-Coax to quickly respond to customer needs with optimized solutions of coaxial cables, connectors, harness assemblies and conductive fibers.
