MICRO-COAX announces one (1) week lead time for orders placed through their webstore

Pottstown, PA - November 29, 2011: MICRO-COAX has announced one (1) week delivery for select custom manufactured UTiFLEX[®] cable assemblies purchased through the MICRO-COAX web store.*

MICRO-COAX has significantly reduced its lead time of its web store offerings to support customer needs for select customized flexible cable assemblies. You can now configure your cable assembly and place the order online for deliveries starting in one (1) week.

To visit the MICRO-COAX webstore: www.micro-coax.com

About Micro-Coax:

Micro-Coax is a leading provider of transmission line solutions for radio frequency (RF) and micro-wave applications. Serving the defense, satellite, telecommunications, test and measurement markets for more than forty years, Micro-Coax has earned a reputation for mission performance and excellent customer service. A broad technology base allows Micro-Coax to quickly respond to customer needs with optimized solutions of coaxial cables, connectors, harness assemblies and conductive fibers.
